Claims 1 & 3-23 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a browning agent used in the amounts described on page 11, lines 23-36, does not reasonably provide enablement for the use of any and all amounts of browning agent in a food. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims.

Claims 1 & 3-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not seen that any and all amounts of sugar acid and amine compounds in any and all formats (powder or liquid) are effective to product a browning composition. An amendment to the claims clarifying this issue, by clarifying that the sugar acid is used in a solution that is used in an amount effective to product browning in a food when it is microwaved, would overcome the rejection.

The rejection of the claims under 35 USC 102 has been dropped in response to applicants' amendment to the claims.
